

2016 Passat
Quick-Start Guide

Das Auto.

The information within this guide must be used in conjunction with the information in the Volkswagen Owner's Manual. Refer to your vehicle's Owner's Manual for all information and warnings. By using this guide, you acknowledge that you are aware of and have read the warnings and information provided in the Owner's Manual on the topics in this guide and will use this information to augment that material.

Driver Controls

- 1. Driver Information Display (Multifunction Display)**
When the ignition is switched on, you can display trip computer information and control a variety of vehicle functions using the multifunction steering wheel.
- 2. Climate Control**
Your vehicle is equipped with an automatic climate control system.
- 3. Infotainment**
Hard keys and touchscreen buttons that control the various infotainment functions, including radio, media selections, phone operation, car functions, and the optional navigation system.
- 4. Start/Stop Engine**
Start and turn off the engine on vehicles equipped with the keyless access push-button start and stop system.
- 5. Steering Wheel Left Side Controls**
Buttons for operating the cruise control system. Increases or decreases volume settings for radio, navigation system notifications, or phone calls.
- 6. Steering Wheel Right Side Controls**
The buttons on the right side of the multifunction steering wheel are used to access functions in the instrument cluster.
Talk Button: Activates the voice recognition system.
Phone Button: Displays the Phone main menu or can be used to accept phone calls.
OK Button: Used to select settings for features in the multifunction display.
Menu Buttons: Used to navigate through the instrument cluster main menus:
Vertical Arrow Buttons: Push to navigate inside a specific menu.
Horizontal Arrow Buttons: Push to change radio stations, scroll through radio presets, or select the next or previous media track.

Introduction to your Passat

Hands-free trunk release

- You must be carrying your vehicle key (in your pocket, hand, or purse).
- The ignition must be off.
- Quickly move your foot and shin as close to the bumper as possible. Your shin must be in the upper part of the sensor's range and your foot in the lower part.
- Quickly move your shin out of range. The high-mounted brake light flashes once, and the rear trunk opens automatically.

Open the trunk

There are three ways to open the trunk:

1. Press and hold the trunk button on the key fob.
2. Pull the trunk release button on the driver door.
3. Press the unlock button twice on the key fob. Then press the large button (called the microswitch) above the license plate and lift.

LEARN MORE AT

[knowyourvw.com](https://www.volkswagen.com)

Key fob shown is available with Optional Remote Start.

Important Safety Instructions and Warnings: Luggage Compartment Lid/Trunk

- Accidents and severe personal injuries can result if you unlock, open, or close the luggage compartment lid when someone is in the way.
- Only open or close the luggage compartment lid if no one is in the way.
- After closing the luggage compartment lid, always make sure that it is properly closed and locked so that it cannot open suddenly when the vehicle is moving. The closed luggage compartment lid must be flush with the surrounding auto body parts.
- Always keep the luggage compartment lid closed while driving to help keep poisonous exhaust gas from being drawn into the vehicle.
- Never open the luggage compartment lid when a luggage rack is installed and loaded. If, for example, there are bicycles on a carrier on the luggage compartment lid, it is possible that the lid will not be able to open automatically. An open luggage compartment lid may fall on its own because of the additional weight. If necessary, prop open luggage compartment lid. Remove the weight from the luggage rack first.
- Close and lock the luggage compartment lid and all doors when the vehicle is not in use. First, make sure that no one is left inside the vehicle.
- Never leave your vehicle unattended or let children play around your vehicle, especially when the luggage compartment lid is open. A child could crawl into the vehicle and pull the luggage compartment lid shut, becoming trapped and unable to get out. A closed vehicle can become very hot or very cold depending on the season. Temperatures can quickly reach levels that can cause unconsciousness or death, particularly to small children.
- Careless use of the Easy Open feature can cause falls and serious personal injury.
- Always make sure you have firm footing when using the Easy Open feature and that the surface you are standing on is not uneven or slippery.
- Never use Easy Open feature unless you can use it safely.
- If a valid vehicle key is within range of the luggage compartment lid, the Easy Open feature can deploy unintentionally in some cases and open the luggage compartment lid: for example, when sweeping the ground or floor below the rear bumper, if there is a strong stream of water or steam, or when carrying out maintenance or repairs around the rear bumper. If the luggage compartment lid opens unintentionally, it can injure anyone or damage anything in its way.
- Never leave a valid vehicle key within range of the luggage compartment lid unattended.
- Always turn off the Easy Open feature through the Volkswagen Information System, Volkswagen Information System in the following situations: before carrying out any maintenance or repairs on the vehicle, before washing the vehicle, and before mounting a bicycle rack or connecting a trailer hitch to the vehicle.

Pairing your Compatible Phone

1. First, check your phone's compatibility at www.vw.com/bluetooth.
2. Start the ignition. Your vehicle's Bluetooth system will be in "discovery" mode.
3. From the Bluetooth menu on your phone, search for new devices and select VW BT with the last four digits of your VIN.
4. A connection request will appear on the infotainment display.
5. Press **Connect** on the infotainment display.
6. The infotainment display will then show a PIN.
7. Make sure the same PIN is displayed on your phone and press **Yes** on the touchscreen, then press Pair on your phone.

Once the PIN is shown, pairing must be completed within 30 seconds; otherwise, the process will need to be repeated.

Pairing a second compatible phone

A second compatible phone can be paired and active in the system.

1. Select **Setup** on the touchscreen (ensure your device is in Bluetooth discovery mode).
 2. Select **Bluetooth** on the touchscreen.
 3. Select Search for devices.
 4. Select **Results** on your touchscreen, then select your device.
 5. Select the device profile option of "Handsfree" or "Bluetooth Audio".
 6. Make sure the same PIN is displayed on your phone and press **Yes** on the touchscreen, then press Pair on your phone.
- Up to four phone profiles can be stored in the system.

Text [PAIR10-16](#) to [38981](#) to watch the Phone Pairing video.

Standard text and data rates apply.
Do not text while driving.

Note: You can have one phone paired and activated to the Bluetooth phone system and another paired for Bluetooth streaming simultaneously. If your phone displays a prompt asking to connect to your vehicle, make sure to enable future automatic connections. This will help to automatically reconnect the compatible paired device to system.

Switching from a primary to a secondary phone

Press the swapping icon on touchscreen.

LEARN MORE AT
knowyourvw.com

Requires compatible phone/device.

Important Safety Instructions and Warnings: Bluetooth® Pairing

- Talking on the phone and/or operating phone control while driving can distract from traffic and lead to accidents.
- Always drive attentively and responsibly.
- Select volume settings so that acoustic signals from the outside are audible, for example, the sirens of emergency rescue vehicles.
- In areas with no or poor mobile network coverage and possibly in tunnels, garages and subways, phone conversations may be interrupted, and it may be impossible to make phone calls – even emergency calls.
- A cell phone on the seat, instrument panel or in other places can be thrown around the inside of the vehicle during a sudden braking maneuver, a crash or other accident and injure vehicle occupants.
- Always fasten mobile phone, additional devices and phone accessories, such as phone holders, notepads, portable Infotainment systems, properly and outside of the inflation area of the airbag or safely stow away during travel.
- Maintain a minimum distance of 20 centimeters between the antenna of the mobile phone and any active medical implants, such as pace makers, as mobile phones can negatively influence the function of active medical implants.
- Using a cell phone or CB radio inside the vehicle without a properly installed and separate outside antenna can be dangerous to your health and that of your passengers because the electromagnetic radiation energy that cell phones and CB radios emit may be above established limits. This also applies if the outside antenna is not installed properly.
- Do not hold an operationally ready mobile phone in the immediate vicinity of or directly over any active medical implant, for example, in the chest pocket.
- Immediately switch off the mobile phone if you suspect interference with an active medical implant or other medical device.
- An open armrest can interfere with the driver's elbow movement and thus cause accidents and severe injuries.
- Always keep the armrest closed while driving.
- Switch off the mobile phone at explosion prone locations.

Enter a Destination on Your Touchscreen

1. Press the **NAV** button.
2. Press **New destn. (New destination)** on the touchscreen.
3. Begin entering address information, starting with House number, Street, City.
4. When your address appears, touch the correct address on the screen.
5. Press **Start** to begin route calculation.

Additional Settings

To include alternative routes and make additional navigation customizations, select **Route Options** prior to starting route guidance.

Here you can include three alternative routes. Use Dynamic route to recalculate route guidance when traffic occurs using SiriusXM Traffic as well as avoid types of roads and more.

Text **NAV10-16** to **38981** to watch the Enter Destination video.

Standard text and data rates apply.
Do not text while driving.

Points-of-Interest (POI)

1. Press **NAV** button, then press **POIs** on the touchscreen to select your point of interest.
 - Tap **Other POIs** on the touchscreen to further define your search.
 - Once you have identified your search category, you have three options:
 - a. Select **Store** and tap OK.
 - b. Select **Dial number** to call the POI if available.
 - c. Select **Start** to begin route guidance.

Note: The navigation SD card must be in one of the Media Box SD card slots.

Views

In the Navigation main menu, press the **View** function button. This gives you a choice to show:

-  a conventional two-dimensional map display.
-  a three-dimensional bird's-eye view.
- Split screen: provides map display along with turn-by-turn directions.

Important Safety Instructions and Warnings: Navigation & Infotainment

- Driver distraction can cause accidents and serious personal injury. Operating the infotainment system while driving can distract the driver from the traffic.
- Always drive attentively and responsibly.
- Select the volume settings so that the acoustic signals from the outside are still audible (for example, the sirens of emergency rescue vehicles).
- Setting the volume too high can damage the hearing. This also applies to loud volume set for only a short time.
- Sudden volume fluctuations may occur when the audio source is changed or connected.
- Please lower the volume before changing or connecting to an audio source.
- Driving recommendations and traffic signs displayed in the navigation system may differ from the actual traffic situation.
- Traffic signs and regulations take precedence over navigation driving recommendations and displays.
- Always adjust your speed and driving style to road, traffic, weather, and visibility conditions.
- Never let yourself be distracted from the traffic by connecting, inserting or removing the device while driving, which can cause accidents.

- Connecting cables of external devices may obstruct the driver.
- Route cables so as not to interfere with the driver.
- Unmounted or improperly mounted external devices can be thrown through the passenger compartment in the event of a sudden driving or braking maneuver or an accident, causing injury.
- Never leave external devices in the doors, on the front windshield, on or near the area marked "AIRBAG" on the steering wheel, instrument panel, seat backs or between these areas and the occupants. External devices can cause serious injury in the event of an accident, especially if the airbags inflate.
- The center armrest can interfere with the driver's elbow movement and thus cause accidents and severe injuries.
- Always keep the armrest closed while driving.
- Injuries can be caused by invisible laser beams if the housing of the CD player is opened.
- Have the CD player repaired only by a specialist.

Navigation

Cruise Control

Activate

- Locate the cruise control buttons on the left side of the multifunction steering wheel.
- Press the  button to activate the cruise control.
- A speedometer icon will appear in the multifunction display.

Setting cruising speed

- When you get to your cruising speed, press the **SET** button on the multifunction steering wheel.
- A green cruise light will appear in the instrument cluster.
- To increase the speed by 1 mph increments, press the **+** button.
- To decrease the speed by 1 mph increments, press the **–** button.

Text **CRUISE10-16** to **38981** to watch the Cruise Control video.

Standard text and data rates apply.
Do not text while driving.

Cancel and resume

- To cancel the cruise speed, press the brake pedal or press the **CNL** button on the multifunction steering wheel.
- The green cruise light will go off.
- To resume your speed, press the **RES** button on the multifunction steering wheel.

The features discussed are not a substitute for attentive driving. See Owner's Manual for further details and important limitations.

Optional Adaptive Cruise Control

The Adaptive Cruise Control (ACC) system helps maintain an individually selected speed between 20 mph and 95 mph and a previously set distance between your vehicle and vehicles in front of you. ACC uses radar, ultrasonic, and video sensors to monitor traffic in front of you. Moving vehicles can be detected within a distance of 590 feet.

When ACC is active, a vehicle symbol is highlighted in the instrument cluster display. The white segments behind the highlighted vehicle indicate the set distance to the detected vehicle in front. When all segments are highlighted in white, ACC is set to the maximum distance to the detected vehicle in front. When only one segment is highlighted, ACC is set to the minimum distance to the detected vehicle in front.

The distance ACC maintains to a vehicle traveling ahead is determined by time intervals. This results in a speed-dependent distance to the vehicle in front. In other words, the higher your speed, the greater the distance to the vehicle in front.

The distance can be set to five different levels by pushing the **ACC** button in the multifunction steering wheel.

Besides changing the distance to the vehicle in front, you can also change the ACC acceleration characteristics by changing your driving profile. To select a driving profile, see your vehicle's Owner's Manual for instructions.

Important Safety Instructions and Warnings: Cruise Control

- Using the cruise control when it is not possible to drive safely at a constant speed can be dangerous and can lead to an accident and serious personal injuries.
- Never use cruise control when driving in heavy or varying traffic or when you cannot keep a safe distance between you and the vehicles ahead of you.
- Never use cruise control on steep, winding, or slippery roads (such as gravel roads, wet roads, or snowy or icy roads) or on roads with standing water.
- Never use cruise control when driving off-road or on unpaved roads.
- Always adjust your speed and the distance you keep between you and the vehicles ahead of you to the road, traffic, weather, and visibility conditions.
- To help prevent unintended operation of cruise control, switch the system off when it is not being used.

- It is dangerous to use the Resume feature when the previously set speed is too high for the existing road, traffic, or weather conditions.
- When going downhill, the cruise control may not be able to maintain a constant speed. The vehicle will speed up because of its own weight. Downshift and/or use the foot brake to slow the vehicle.
- Failure to heed warning lights and instrument cluster text messages can cause the vehicle to break down in traffic and result in a collision and serious personal injury.
- Never ignore warning lights or text warnings.
- Always use the vehicle as soon as it is safe to do so.

Important Safety Instructions and Warnings: Adaptive Cruise Control

- Always remember that the Adaptive Cruise Control has limits – using Adaptive Cruise Control when it is not possible to drive safely at a constant speed can be dangerous and can lead to an accident and serious personal injury.
- Adaptive Cruise Control will not slow the vehicle down or maintain the set distance when you drive toward an obstacle or something on or near the road that is not moving, such as vehicles stopped in a traffic jam, a stalled or disabled vehicle.
- Always adjust your speed and the distance you keep between you and the vehicles ahead of you to the road, traffic, weather, and visibility conditions.
- Never use Adaptive Cruise Control on steep, winding, or slippery roads (such as gravel roads, wet roads, or snowy or icy roads) or on roads with standing water.
- Never use Adaptive Cruise Control when driving in heavy or varying stop-and-go traffic.
- Never use Adaptive Cruise Control when driving off-road or on unpaved roads.
- Always remember that the Adaptive Cruise Control cannot detect a vehicle that is driving toward you in your traffic lane and that it cannot detect narrow vehicles such as motorcycles and bicycles.
- Never follow a vehicle so closely that you cannot stop your vehicle safely. The Adaptive Cruise Control cannot slow or brake the vehicle safely when you follow another vehicle too closely. Always remember that the Adaptive Cruise Control has a braking power that is only about 30% of the vehicle's maximum braking ability; under certain circumstances the automatic braking function cannot bring the vehicle to a stop in time.
- Always turn off Adaptive Cruise Control when entering turn lanes, exit lanes and construction zones or in similar situations because the vehicle will automatically accelerate to the stored speed when the road ahead is clear.
- To help prevent unintended operation of Adaptive Cruise Control, switch the system off when it is not being used.
- It is dangerous to use the Resume feature when the previously set speed is too high for the existing road, traffic, or weather conditions.

- When traveling downhill, the Adaptive Cruise Control may not be able to maintain a constant speed. The vehicle will speed up because of its own weight. Downshift and/or use the foot brake to slow the vehicle.
- Never allow the closing speed between you and other vehicles to be so high that the Adaptive Cruise Control may not be able to slow your vehicle safely. If closing speed is too high, you must apply the brakes yourself to reduce the risk of a rear-end crash.
- If a driver intervention warning or Front Assist warning appears in the instrument cluster display, immediately take over the control of the brake and gas pedals and slow down the vehicle or bring it to stop when necessary and according to the traffic situation.
- Always be prepared to take over the control of the brake and the gas pedal in every situation.
- Following other vehicles too closely increases the risk of collisions and serious personal injury or even death.
- Always obey applicable traffic laws when setting the distance to the vehicles ahead in traffic.
- Setting short distances to the traffic ahead reduces the time and distance available to bring your vehicle to a safe stop and makes it even more necessary to pay close attention or traffic.
- Always use good judgment and select a safe following distance for the traffic, road and weather conditions.
- Never use Adaptive Cruise Control on narrow or winding roads or under poor road conditions (snow, ice, streets covered with standing water or gravel, for example) or when visibility is poor, especially when it is foggy.
- Always select a greater following distance to the vehicle ahead on wet roads than on dry roads.
- For additional warnings please refer to your vehicle's Owner's Manual for Radar Sensor, Operating and Deactivating Adaptive Cruise Control, and special driving situations.

Cruise Control

Call by Name

1. Short press the **TALK** button on the multifunction steering wheel.
2. After the chime say, “Call”, followed by the name of the person you want to call. For example, “Call Mike Brown”.
3. The system will confirm “Do you want to call Mike Brown?” and respond, “Contact is being dialed”.

Voice Recognition tips

- The name must be said exactly as it is stored in the directory. If the name is not recognized, ensure you are saying it as it is stored in the directory.
- If multiple numbers are stored per name, you may use the shortcut “Call Mike Brown at work”, or the system may ask you to choose (e.g., work, mobile, home, etc.).

Help

1. From the Phone menu, press the **TALK** button on the multifunction steering wheel, and a selection of possible voice commands appears.
2. Say, “Help”, then follow the prompts.
3. You can say, “Help” after any prompt for the system to give you additional available options (e.g., call history, read telephone contacts, or settings).

Text [VOICE10-16](#) to [38981](#) to watch the Phone Voice Recognition video.

Standard text and data rates apply.
Do not text while driving.

Answer an incoming call

The Bluetooth system will interrupt your car stereo with a ringtone. Press the **PHONE** button on the multifunction steering wheel to answer the call, or you may select on the touchscreen.

Switch to privacy mode

To switch a Bluetooth call to your mobile phone, which would prevent passengers from overhearing the conversation:

1. Use the right/left arrow buttons on the steering wheel to access the telephone menu in the Multifunction Display (MFD).
2. Press the up or down button until “Private” appears in the display.
3. To select, press the **OK** button on the multifunction steering wheel.

End call

Press the red phone icon on the touchscreen.

Or

1. Use the **MENU** button on the multifunction steering wheel to access the telephone menu in the Multifunction Display.
2. Press the up or down button until “End” appears in the display.
3. Press the **OK** button on the multifunction steering wheel.

Volume settings

To adjust the volume of the Bluetooth system while in a call, press the volume up or volume down switch on the left side of the multifunction steering wheel.

[knowyourvw.com](#)

Note: Voice Recognition available on certain trim lines only.

Important Safety Instructions and Warnings: Voice Recognition

- Driver distraction can cause accidents and serious personal injury. Operating the infotainment system while driving can distract the driver from the traffic.
- Always drive attentively and responsibly.
- Select the volume settings so that the acoustic signals from the outside are still audible (for example, the sirens of emergency rescue vehicles).
- Setting the volume too high can damage the hearing. This also applies to loud volume set for only a short time.
- Sudden volume fluctuations may occur when the audio source is changed or connected.
- Please lower the volume before changing or connecting to an audio source.
- Never let yourself be distracted from the traffic by connecting, inserting or removing the device while driving, which can cause accidents.
- Connecting cables of external devices may obstruct the driver.
- Route cables so as not to interfere with the driver.
- Unmounted or improperly mounted external devices can be thrown through the passenger compartment in the event of a sudden driving or braking maneuver or an accident, causing injury.

- Never leave external devices in the doors, on the front windshield, on or near the area marked “AIRBAG” on the steering wheel, instrument panel, seat backs or between these areas and the occupants. External devices can cause serious injury in the event of an accident, especially if the airbags inflate.
- The center armrest can interfere with the driver's elbow movement and thus cause accidents and severe injuries.
- Always keep the armrest closed while driving.
- Injuries can be caused by invisible laser beams if the housing of the CD player is opened.
- Have the CD player repaired only by a specialist.
- Switch off the cell phone at explosion-prone locations.
- Driving recommendations and traffic signs displayed in the navigation system may differ from the actual traffic situation.
- Traffic signs and regulations take precedence over navigation driving recommendations and displays.
- Always adjust your speed and driving style to road, traffic, weather, and visibility conditions.

Voice Recognition Telephone

App-Connect

App-Connect takes the features and functions of your smartphone and makes them available through the built-in infotainment touchscreen in your Volkswagen.

App-Connect is available on certain infotainment units only. Always pay careful attention to the road, and do not drive while distracted. App-Connect features require compatible device, operating system, and mobile app. Standard text and data usage rates apply. See mobile app provider for terms and privacy. Android Auto is a trademark of Google Inc. Apple CarPlay is a trademark of Apple Inc.

Apple CarPlay™

1. Ensure your phone is unlocked.
2. Plug your Apple iPhone into the USB port using a certified lightning connector.
3. A screen appears telling you that a new device has been detected and asking, “Do you want to connect with Apple CarPlay?”
4. Select **Connect** and allow on device.

Features

CarPlay features Siri voice control. There are two ways to activate Siri (Siri must be enabled on device to activate Siri features):

- a. Press and hold the **Talk** button (voice control button) on the steering wheel until you hear the tone, which activates Siri.
- b. Press and hold the **Home** button on the touchscreen to activate Siri.

1. **Home** Button: Two features include:
 - Backward to Apple CarPlay home screen.
 - Long press to activate Siri.
2. **Phone** Button: Siri can help you make calls, return missed calls, and listen to voicemail.
3. **Maps** Button: Activate Siri to assist with turn-by-turn directions, traffic conditions, and estimated travel time. Say “Navigate to.”
4. **Messages** Button: Siri can send, read, and reply to your text messages for you.

Additional apps available to stream music include Pandora, iHeartRadio, and Spotify.

5. To exit Apple CarPlay, press the Volkswagen logo icon.

Text [CARPLAY10-16](#) to [38981](#) to watch the Apple CarPlay video.

Standard text and data rates apply. Do not text while driving.

Android Auto™

1. Download Android Auto from Google Play.
2. Press the **MENU** hard key and select App-Connect.
3. Select the Setup icon on the touchscreen > Preferred connection > Select Android Auto.
4. Plug your Android device into the USB port using a certified cable.
5. Select **Device list** on your touchscreen, and select your device.
6. Select **OK** on your touchscreen for data transfer prompt.
7. Follow instructions on your device to continue setup.
8. Android Auto will appear on the infotainment touchscreen (once all of the prompts have been accepted on device).

Features

1. **Microphone** Button: Google Voice Control can be activated by a long press, or touchscreen voice commands work with available apps. (Google Voice Control can also be activated with a long press on the voice control button on the steering wheel).
2. **Navigation** Button: Predictive navigation provides turn-by-turn directions, traffic conditions, and estimated travel time. Android Auto can predict where you want to go next based on your calendar and recent destinations.
3. **Phone** Button: Listen and reply to text messages, make calls, or check your voicemail.
4. **Home Screen** Button: Takes you back to the home screen of Android Auto.
5. **Music and Audio** Button: Use your touchscreen to gain access to your favorite artists, songs, and playlists*. Android Auto lets you download audio streaming apps such as Pandora, Spotify, and iHeartRadio.
6. **Vehicle Functions** Button: Return to Volkswagen screen.

*For driver distraction reasons Android Auto does not list all the media on your phone. Use Google voice control instead to access specific albums or artists.
Note: Apple CarPlay is compatible with iPhone 5 or higher running iOS 7.1 or later. Further information is available on [siriuserguide.com](#).
Android Auto is supported by phones running 5.0 (lollipop) or higher. Further information is available on [android.com/auto](#).

Important Safety Instructions and Warnings: App-Connect

- Loose or improperly installed mobile devices can be thrown around the passenger compartment during sudden driving or braking maneuvers or a crash and cause serious personal injuries.
- Always mount or stow mobile end devices away properly before driving, making sure that they are outside the operational area of the airbags.
- Applications that are improperly executed can cause damage to the vehicle, accidents and serious injuries.
- Volkswagen recommends using only applications provided by Volkswagen.
- Protect the mobile end device and its applications from misuse.
- Never change applications.
- Adhere to owner's manual of the mobile end device.
- Using applications while driving can distract from traffic. Driver distraction can cause accidents and serious personal injury.
- Always drive attentively and responsibly.

Infotainment

Warning and Indicator Lights

For additional information on indicator lights, refer to your vehicle's Owner's Manual.

	Parking brake engaged.		Lights up: ESC malfunction or ESC switched off by the system. Flashes: ESC or ASR is working.		Passenger front airbag turned off (PASSENGER AIR BAG OFF  light).
PARK	Parking brake engaged.		ABS malfunction.	OFF	Passenger front airbag turned off (PASSENGER AIR BAG OFF  light).
	Stop! Brake fluid level too low or brake system malfunction.	ABS	ABS malfunction.		Blind Spot Monitor malfunction.
BRAKE	Stop! Brake fluid level too low or brake system malfunction.		One or more driving lights burned out. Cornering light malfunction.		Turn signals, left or right. Emergency flashers switched on.
	Stop! Lights up: Engine coolant level too low, too high, coolant temperature too high, or engine coolant system malfunction. Flashes: Engine coolant system malfunction.		Not enough windshield washer fluid.		Fog lights switched on (indicator light on the headlight switch).
	Stop! Engine oil pressure too low.		Lights up: Engine control / monitoring system malfunction (engine Malfunction Indicator Light - MIL).		Daytime running lights (DRL) on.
	Stop! At least one vehicle door is ajar or not closed properly.		Lights up: Diesel engine preheating. Flashes: Engine control malfunction.	DRL	Daytime running lights (DRL) on.
	Stop! Engine hood is open or not closed properly.	EPC	Engine control malfunction.		Lights up: Depress brake pedal! Flashes: The lock button in the selector is not engaged.
	Stop! Luggage compartment lid is open or not closed properly.		Diesel particulate filter clogged with soot.		Cruise control is regulating vehicle speed.
	Stop! Lights up or flashes: Steering system malfunction.		Lights up or flashes: Problem with the steering.	CRUISE	Cruise control is regulating vehicle speed.
	No engine restart possible! Not enough AdBlue® or AdBlue® system malfunction.		Lights up: Tire pressure too low. Flashes: Tire Pressure Monitoring System (TPMS) malfunction.		High beams switched on or headlight flashers in use.
	Driver and/or passenger safety belts not buckled.		Fuel tank almost empty.		Service reminder display.
	Alternator malfunction.		Fuel tank almost empty.		Mobile phone is connected via Bluetooth to the factory-installed mobile phone package.
BRAKE WEAR	Front brake pads worn.		Refill AdBlue® tank or AdBlue® system malfunction.		Charge level of the mobile phone battery. Applies only to models with a factory-installed mobile phone package.
	DSG® transmission too hot.		Fuel filler cap not properly closed.		Icy road warning. Outside temperature colder than +39 °F (+4 °C)
	Lights up: ESC malfunction or ESC switched off by the system. Flashes: ESC or ASR is working.		Airbag and safety belt pretensioner system malfunction.		Failure to heed warning lights and instrument cluster text messages can cause the vehicle to break down in traffic and result in a collision and serious personal injury. Never ignore warning lights or text WARNINGS.
