QUICK GUIDE

No.	Function	Page
1	Displays the condition of the Bluetooth connection when a Bluetooth device is connected.	24
2	Select to display the “Customize Split Screen (Customize Split Screen)” screen.	43

STATUS DISPLAY

The status of the Bluetooth connection and so on is displayed on the screen.

No.	Indicators	Conditions
1		This icon is displayed when a disc has been inserted.
2		This icon is displayed when audio is off or mute.

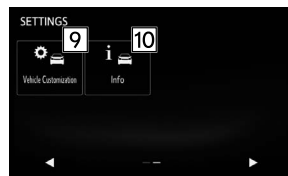

No.	Indicators	Conditions
3		This icon is displayed when the Bluetooth connection is established. An antenna for the Bluetooth connection is built into the instrument panel. The condition of the Bluetooth connection may deteriorate and the system may not function when a Bluetooth phone is used in the following conditions and/or places: The cellular phone is obstructed by certain objects (such as when it is behind the seat or in the glove box or console box). The cellular phone is touching or is covered with metal materials. Leave the Bluetooth phone in a place where the condition of the Bluetooth connection is good.
4	The level of reception	 Poor ← → Excellent  The level of reception does not always correspond with the level displayed on the cellular phone. The level of reception may not be displayed depending on the phone you have. "Rm" is displayed when receiving in a roaming area. While roaming, display "Rm" top-left on the icon. The receiving area may not be displayed depending on the type of phone you have.

No.	Indicators	Conditions
5	The amount of battery charge left	 The amount displayed does not always correspond with the amount displayed on the Bluetooth device. The amount of battery charge left may not be displayed depending on the type of the Bluetooth device connected. This system does not have a charging function.
