Sport Seat Upholstery Kits

Early model seats were designed to look good and be reasonably comfortable. However, when you want to really drive, they fall short. These Sport Seat kits address this with more supportive side bolsters to hold you in place with maximum comfort. Available headrests add to the comfort and safety of these kits. The best part is that you use your existing seat frame, so the original style of your pony is retained. Available in a variety of colors combinations to blend in with your interior, or add a splash of style to your ride.

Seat Upholstery

Our seat covers are manufactured in the original colors and materials. Professionally made from the finest quality materials available, with special attention given to the authenticity and quality of workmanship, these upholstery kits are preferred by many trim shops. The vinyl used for our seat covers is the correct weight, grain and color as original. Even the backs are included with correct stitching (where applicable). The front seats come in a pair for buckets or one front bench seat. A complete set includes the front bench or bucket seats and the rear seats. The bench seat covers include upholstery for the center armrest.

Silencer Megabond

Thermal Insulating and High Frequency Sound Absorbing Foam is the perfect material to use to reduce both heat transfer & the high frequency noise caused by road surface variation (tire noise), engine noise, and wind noise passing behind trim panels. Aggressive butyl based adhesive on back for one step peel and stick application. Stick to sheet metal or fiberglass vehicle surface, or if you want the ultimate COOL & QUIET interior, install it directly onto aluminum surface of HushMat Ultra vibration damping material. (2) 23" x 35" sheets.

Ultra H20 Acoustic Paste
HushMat Ultra H-2-O is a water based formula applied with a standard 1/10th gallon caulk gun and our EZ application nozzle. Squeeze nozzle provides a consistent 1 inch by 1.5mm bead for optimum performance. Paintable and sandable when cured for 3 hours or less. No ventilation, tools or other application equipment required. Allows for adhesion to sheet metal, wood and fiberglass surfaces and maintains flexibility when cured.

Acoustic Barriers & Heat Shields

AcoustiSHIELD® by Quiet Ride Solutions

Multi-stage, automotive insulation & sound damping system gives the quiet riding comfort found in newer vehicles. Insulates and controls the noise, vibration & heat in the passenger cabin. Reduces road & mechanical noise, exhaust harmonics, body panel & audio system vibration & radiated & reflected heat.

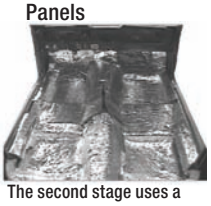

Body Kit
All panels below the beltline including Package Tray, Seat Divider, Rear Wheel Wells, Fenders, Rear Quarter and Tail Panels. (As Required)

Stage 1 Sound Damper Pads

The first stage consists of pre-trimmed, self-adhesive, Sound Damper Pads, bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in the kit.

Stage 2 Heat Absorber/ Panels

The second stage uses a high-tech absorber/barrier material, bonded to the body panels, to both sound deaden and insulate the vehicle from radiant heat penetration from the engine and road. Each absorber panel is cut to the correct shape and contour and is mapped and labeled in the detailed instructions.

Kits Include:
- **Stage 1** Pre-Sized Sound Damper Pads
- **Stage 2** Pre-Trimmed Heat Absorber / Barrier Panels, Spray Adhesive and Sealing Tape
- **Complete Illustrated Installation Instruction**

PC6466BLK

Plug-N-Chug Ashtray Drink Holders

In the 'sixties, no cars had drink holders. Now we can't imagine a car without provision for our refreshments. This clever dual drink holder simply presses into the ashtray in the dash of 1965-1973 Mustangs.

It's a nice tight fit so it won't wobble. The edge of it is padded and the eleven different colors can be matched or contrasted to your interior.

Interior Paint & Vinyl Dye

641809

Restore the vinyl and interior trim on your Mustang to the original color with our formulated finishes exact to OEM specifications. Each 12 ounce can features a Davern Fanspray nozzle which produces a professional finish on any surface. Use the paint for metal and plastic and the vinyl dye for soft flexible parts like your dash. All vinyl dye is semi-gloss.

We suggest using vinyl prep first before using dye.

Billet Instrument Bezels

CNC machined from billet aluminum. Bolts right in place of a stock bezel. Use with Wiring Harness, #WH1 to hook up to the stock harness.

IB11

This unique instrument bezel will allow you to install four 2-5/8" gauges of your choice, along with a 3-3/8" speedometer. Allows the use of the original rally pack gauges if your car is so equipped. Made of T6061 aluminum.

Sunpro
The Performance Legend™

Founded in the 1950's, Sun electric tachometers became the industry standard for the first generation of performance enthusiasts. Today, as SunPro, they remain an industry leader and the gauges of choice for the America's street and track machines. Known for quality and dependability, SunPro's line of products covers the enthusiast's needs at the right price.

Mechanical gauges need an 18 gauge lead wire for the illumination to function. Fittings and tubing included unless noted. Electrical gauges need an 18 gauge lead wire for gauge & illumination function. Sending unit included unless noted.

Engine Rotating Assembly Kits

Choose your kits based on your desired compression and displacement. Dished pistons are great for lower-compression forced induction engines. Flat top pistons designed for building a higher than stock compression engine. Domed pistons are designed for use when building a high compression engine.

Kits include: • Crankshaft • 8 forged connecting rods with ARP rod bolts • 8 forged pistons. Please read specifications thoroughly before ordering.

These blueprinted crankshafts include matching rod & main bearings.

9000 Series features cast lightweight crankshaft and I-beam connecting rods.

PROBE INDUSTRIES

Street Fighter Stroker Kits

These kits are good for engines producing a maximum of 500-600 horsepower. Great for cars that are mainly driven on the street but may occasionally be taken to the track. Includes rings and bearings.

The 306 Street Fighter

Includes: 4.030" pistons, 3.000" race prepped nodular crank, 5.090" I-beam rods, rings & wrist pins.
302 ..... **SF306** ..... **$849.95 kit**

The 331 Street Fighter*

Includes: 4.030" pistons, 3.250" cast steel crank, 5.400" I-beam rods, rings & wrist pins.
302 ..... **SF331** ..... **$934.95 kit**

The 347 Street Fighter*

Includes: 4.030" pistons, 3.400" cast steel crank, 5.315" I-beam rods, rings & wrist pins.
302 ..... **SF347** ..... **$999.95 kit**

357W Street Fighter

Includes: 4.030" pistons, 3.500" nodular crank, 5.956" I-beam rods, rings & wrist pins.
351W..... **SF357** ..... **$999.95 kit**

393 Street Fighter

Includes: 4.030" pistons, 3.850" nodular crank, 5.956" Race-prepped rods, rings & wrist pins.
351C..... **SF393C** ..... **$1,599.64 kit**

Forged Piston Sets

Choose your pistons based on your desired compression and displacement. Dished pistons are great for lower-compression turbo, nitrous or supercharged engines. Flat top pistons designed for building a higher than stock compression engine. Domed pistons are designed for use when building a high compression engine. Sold as a set of (8) pistons. Please see the chart for a list of piston specifications.

ARP

1545001

ARP bolt kits feature 6-point heads with parallel-ground, hardened washers. Made from 8740 chrome moly steel, all bolt sets are heat treated to 170,000 PSI and exceed aircraft quality standards. The threads are rolled after heat treating, which gives them about 1000% longer fatigue life than most main bolts, which are threaded prior to heat treating.

Main Stud Kits

Studs are generally better than bolts in that they eliminate main cap "walk" and fretting, as well as protect the threads in your block from being stripped or cross-threaded. ARP stud kits feature 6-point aircraft grade nuts with parallel-ground, hardened washers. Made from 8740 chrome moly steel, all stud sets are heat treated to 190,000 PSI and exceed aircraft quality standards. The threads are rolled after heat treating, which gives them about 1000% longer fatigue life than most main studs, which are threaded prior to heat-treating.

Ford RACING PERFORMANCE PARTS

CNC Ported "Z304"

This is a bare cylinder head with high-flow ports.

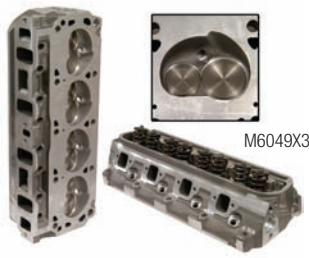

- Cast from A356 T6 aluminum
- 63cc CNC'd combustion chamber
- Intake port volume as cast 204cc
- Exhaust port volume as cast 85cc
- Steel alloy intake & exhaust valve seats installed (no valve job)
- Manganese-bronze valve guides installed w/ semi-finished ID
- Suggested valve size 2.02" intake & 1.60" exhaust
- Raised exhaust port exit, custom headers may be required
- Requires competition valve job & bowl blending
- Requires screw-in rocker studs & roller rockers

Cylinder Heads

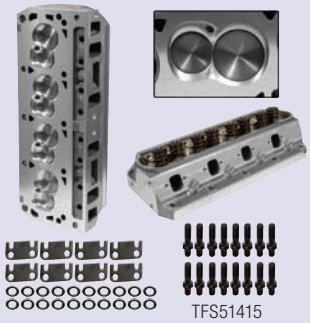

Trick Flow®

Twisted Wedge Fast-As-Cast

The intake and exhaust valves are moved closer to the center of the cylinder bore for better combustion. These assembled heads can be used with most intake and exhaust manifolds, and with camshafts up to 290° duration. Fast-As-Cast flows like CNC-ported heads right out of the box, without the time & cost associated w/ CNC porting. The result is near CNC-ported power and performance for the cost of ordinary cast heads.

Cylinder Heads

Air Flow Research cylinder heads feature CNC-machined aluminum construction. The thick 3/4" deck makes them great for blower/nitrous applications. All heads are fully assembled with screw-in studs, guideplates and valve springs. Sold as a pair.

NOTE: '86 5.0L MUST have pistons notched for valve clearance. All others should check piston/valve clearance to prevent damage, particularly with 2.02" or larger valves.

Cylinder Heads

RHS® Pro Action™ cylinder heads are available for 5.0/5.8L applications. In cast iron or aluminum, and in a variety of intake runner and combustion chamber volumes. Pro Action™ heads are the perfect cylinder head for street rods, muscle cars, oval track, and drag racing. With a long list of desirable standard features Pro Action™ Small Block Ford cylinder heads are the race winner's choice.

FEATURES:
- Multi-angled intake valve seats
- Radius exhaust valve seats
- Improved valve guide design
- Highly efficient water jacket
- Manganese intake valve guides
- Bronze exhaust valve guides
- Hardened valve seats
- Extra-thick 3/4" deck faces
- 3/8" rocker studs flat tappet
- 7/16" for roller heads
- 5/16" guideplates

1-Requires screw-in studs & guide plates.
2-Requires machining on cylinder heads.
3-Timing set does NOT fit 250 engines.
7-Stock springs cannot be used, use with recommended CompCams springs only.
33-Pre '72 engines use part CC3220.
36-'62-69 use part #CC7632
37-Adjustable valve train required.
56-'63-67 with non-rail rockers or if equipped with studs and guide plates use part #CC1442.

Camshaft components are listed on the following two pages.

Nostalgia -The latest and advanced camshaft technology gives you the sound and excitement of the muscle car era, with additional power you can feel.
High Energy -High torque cams that work great on the street. You may notice an increase in your gas mileage when switching from a stock cam.
Xtreme Energy -These are COMP Cams newest in hydraulic and hydraulic roller cams. Their aggressive lobe design produces greater throttle response and top end horsepower while delivering increased engine vacuum.

Street/Strip/Road Race Kicked-Out Narrow Front Sump Pans

Kicked-out front sump increases oil capacity which reduces oil temps and insures oil supply to the pickup. Welded baffle over the front sump keeps oil in the pickup area during hard driving. Will clear 4-bolt center mains only; will not clear 4-bolt front/rear main caps.

CONCEPTONE PULLEY SYSTEMS

Engine Accessory Kits

CONCEPTONE Engine Accessory Kit w/ Serpentine Drive. Available in machined or polished finish.
Kits Include:

- 100 amp alternator, fan & pulley cover
- Tensioner w/ cover, Goodyear serpentine belt
- Billet crank, water pump, alternator & tensioner pulleys
- Bracket set for alternator & tensioner
- Chrome plated nuts, bolts & washers

Depending on your particular application your kit may also contain some or all of the following:

- A/C compressor w/hard lines & nose cover
- A/C compressor bracket
- Power steering pump w/billet mini reservoir
- P/S pump bracket

Carburetor Rebuild Services

We have two available services for your carburetor: a Carburetor Rebuild Service & a Concours Rebuild Service. Send us your carburetor in a new shipping box with the return address, a daytime phone number, & payment. Turn around is approximately 3 weeks. With either service your carb is fully disassembled, rebuilt, reassembled with correct hardware, run tested & adjusted. Price includes a core charge covering missing parts, unrebuildable cores, or replacement of an incorrect carb. You receive a correct carb, even if yours was incorrect! Any unused portion of the core charge will be refunded.

New Water Pumps

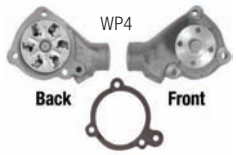

This new, not remanufactured water pump has an increased impeller count to improve low speed/rpm cooling. At low rpm, the water flow rate is doubled, then at 3,500 rpm the flow rate returns to normal to prevent too much water flow at high speed.

5-Speed Transmission Conversion Parts

TRA531

T-5 Conversion Kits

This kit will help swap in a T-5 transmission with minimal changes to the car. It adapts as much of the stock pieces as possible to minimize modifications. There are two types of kits: one for those using original bellhousing and one for those using a late-model T-5 bellhousing. Kits include: adapter plate, crossmember, transmission mount, and slip yoke. Kits designed for T-5 bellhousings include fulcrum/spacer kit and no adapter plate.

Competition Transmissions

Performance Automatic Competition C4 case fill transmission. PA has re-engineered the C4, creating a transmission that the drag racer can rely on year after year. Delivers firm, positive shift characteristics for large displacement, nitrous and supercharged engines. Reliability due to deep aluminum pan for greater cooling, reverse manual valve body, Alto red clutches and Kevlar bands.
..... **PA26103** ..... **$1,324.64 ea**

C4 Ultimate Conversion Package

Kit includes: C4 Competition Transmission w/ Reverse Manual Valve Body, 10" Pro Launch Torque Converter (3000-4200 stall), SFI Flexplate, SFI Pro Fit bellhousing, dipstick & filler tube, transmission cooler, Hurst quarter stick, fittings & cooler lines, neutral safety switch, shifter cable & brackets, deep aluminum transmission pan with built-in drain plug, pro shift servo, small block Ford multi-fit blockplate, all necessary hardware & instructions.

FE21

In 1968 Ford changed the 4th mounting pin to be on the tail of the horse to prevent breaking off. These emblems have that improved location. Earlier cars should drill a new hole, or remove the pin. Barrel nuts included. Running horse for all '65-66 models and '67-68 models with 6 cylinder.

OEM-Style Tires

BFGoodrich Tires

These tires are exact replacements manufactured on the original molds here in the U.S.A. As such, they duplicate the originals exactly. Radial tires are great, particularly when building a driver, but the just don't cut it when a correct restoration is your goal. Remember these tires are accurate reproductions both in style and function. We generally do not recommend bias- ply tires for street use, and suggest that for your garaged show-car that appropriate storage measures be taken.

CBW2A

Cobra Brake and SN95 Wheel Conversion Kits

Add '94-'04 Cobra brake components & 17" wheels from any 1994-2004 Mustang!
Specify (A) Small, (B) Large or (C) Torino bearing for rear axle.

CBW1 ___
Part # Rear Axle

Kit includes:
- CAD designed, CNC milled & laser cut brackets bolt to your original spindles/axle.
- Custom made hub-centric adapter shims take up the gap between the hub or axle end snout and rotor hub hole. This makes the rotor truly hub-centric.
- 1" wheel spacers with ARP studs.
- Grade 8 & 10.9 mounting hardware to mount brackets to spindles/axle & caliper anchors to brackets.

What you need:
- '94-04 Cobra/Mach 1/Bullitt front & rear rotors
- Inner & outer bearings, races, dust seals, washers, nuts, cotter pins & dust covers.
- '94-04 Cobra/Mach 1/Bullitt calipers & pads.
- Cobra caliper anchors with retaining pins & e-style retaining rings.
- Master cylinder. Early Cobra calipers with 2 x 38mm pistons, use 15/16ths bore master. Later Cobra's & Mach 1's with 2 x 40mm pistons, use 1" bore master , #101518
- Brake proportioning valve, #M2328C
- Parking brake conversion kit #BCC1 ('65-66) or #BCC2 ('67-73)
- Stainless steel braided flex brake hose kit #CBH1 (Four wheel kits only, front kits use #CBH2, rear kits #CBH3)

Note: front brake line bending & flaring is needed to install master cylinder & prop valve just like any disc brake conversion.

Customize Your Kit!

All SSBC Force 10 brake kits that include calipers, can be ordered with the calipers powdercoated in custom colors of black, red, yellow, blue or orange for an additional $125. To order custom colored calipers in your kit simply use the standard part number for your kit with a "C" at the end.

Only $125.00!

NOTE: Colors are approximate. Due to printing variations they may not exactly match end product.

Upgrade to Slotted or Big Bite Cross-Drilled rotors!

All SSBC disc brake kits can be upgraded to either Slotted or Big Bite Cross-Drilled rotors. Upgrading from Plain to Slotted rotors or Slotted to Big Bite Cross-Drilled rotors adds just $100.00 to the cost of the kit. Upgrading from Plain to Cross-Drilled rotors adds just $200.00 to the cost of the kit. Add an "S" at the end of the part # for Slotted upgrade or add "R" at the end of the part # for Big Bite Cross-Drilled upgrade. **Not available for 6-cylinder kits.*

Category 5 Front Disc Brake Kits

This brake kit is specially designed to keep the load on the spindle, just like the factory. The hubs/hats are offset specifically for the 1-1/4" wide rotors.
11.75" kits will require 15" or larger wheels, 12.20" kits 16" or larger, and 13" kits 17" or larger. '69 owners will need to identify which spindle they have, in mid '69 Ford changed to larger diameter bearings and spindles (0.865").

- Billet aluminum hubs with 1- 1/2" long X 1/2" dia. studs
- Aluminum hats
- Vented 1-1/4" thick rotors
- Bearing/seals
- 4 or 6 piston calipers
- Brake pads
- Braided Steel Lines

Disc Brake Components

Front Disc Brake Rotors

Vac-U-Slots machined into the rotor wipe brake pads clean, evacuate gases, and shed heat. This reduces the boundary layer of gases that builds up between the pad and rotor to inhibit performance. Manufactured to high tolerances, slotting, unlike drilling, doesn't cause stress points that can lead to cracking. Cadmium plated to minimize corrosion.

Shockwave Front Air Suspension

Using OEM mounting points, you can replace your stock front shock absorbers & springs with an adjustable air suspension. This combination air spring and shock absorber gives you complete ride control as well as adjustable ground clearance. Kits with Quickset 1 shocks have a single 16-stop knob, while Quickset 2 shocks have two 16-stop knobs, for even more control.

NR46N

Negative Roll Systems

This system lowers the vehicle approximately 1-1/4" from stock height. By changing front suspension geometry, this system allows negative camber to maximize true contact patch when cornering. Fully assembled with bulletproof tubular steel, billet cross shafts, Del-A-Lum bushings (the ultimate), corrected ball joint angles, & instructions. Lifetime warranty. Works with all performance springs except for stock.

Rack and Column Conversion Kits

Designed specifically to work with each other, this steering rack & tilt column provides better road feel while maintaining correct geometry, allowing the wheels to turn at least as far as the OE system. The tubular steel rack acts as a structural member, provides header clearance and doesn't decrease ground clearance.

BORGESON
Steering You Forward

The Borgeson Universal Company has been manufacturing steering universal joints and components for the industrial, automotive, military, and aerospace markets since 1914. Purchased by the present owners in 1982, Borgeson continued to develop and refine our original needle bearing universal joint into the finest and strongest joint you can buy. Seeking to expand, Borgeson purchased Mullins steering gears in 2001 and combined the two businesses into one central, 50,000 square foot modern manufacturing facility. Borgeson has continued to develop and produce the most dependable steering components available.

Power Steering Conversion Kits

Eliminates the factory control valve & slave cylinder which provides modern steering feel & feedback with a quick 16:1 ratio. No modifications required to the shock tower, bolts in to the factory location & works with the stock pitman arm. Kits to convert from manual steering include a modern Saginaw style pump with brackets, kits for cars already with power steering are designed to work with your original Ford pump, but the optional Saginaw pump is needed for proper feel & assist at low rpms.

NOTE: Will not fit factory Z-Bar style clutch linkage. Late 1967-1970 cars with collapsible steering column, the column must be collapsed about 2" for clearance.

- Cast iron gears are compatible with cast iron camshafts (hydraulic or solid flat tappet type).
- Steel gears are compatible with billet steel camshafts (hydraulic roller tappet type).
- Bronze gears can be used with either cast iron or billet steel camshafts. They are usually recommended by manufacturers of billet steel solid roller camshafts.
- Bronze gears are softer than cast iron and steel, and will wear at a faster rate.
- Polymer gears are compatible with all camshafts.

Timing Retard Control Module

This timing control module is a great way to add 0-20 degrees of timing retard in three modes: continuous, demand, and boost proportional. Allows adjustment of timing from inside the car, and can be mounted under the dash. A LED light comes on when retard is commanded. This product is not intended for underhood mounting. For boost proportional mode to be used, Crane MAP sensor is required.
For use with Crane HI-6, HI-6R, and HI-6DSR ignition systems.....**CR6425**.....**$125.95 ea**

Map Sensor

This is the MAP (Manifold Absolute Pressure) sensor that must be used for the boost proportional setting of the Crane CR6425 timing retard control module. This is a 2-bar design for forced induction applications with up to 20 lbs. of boost.

Ignition Control Modules

MSD IGNITION

The MSD control modules produce a series of sparks during every firing of the spark plugs (production ignition produces only one spark). This improved design ensures complete ignition of the air/fuel mixture in each cylinder thus producing more power, easier starting, reduced plug fouling and better fuel economy. MSD performance modules produce power up 10,000 rpm. Available in classic analog style and new digital style. Fits most 4/6/8 cylinder engines with 12-18 electrical system and a distributer.

Digital

6425

New digital technology offers higher output with 530 primary volts and 135 135 millijoules of spark energy. More efficient components use less current to produce more power. All units have a built-in LED for system checks and all wires exit the same side through a locked, sealed connector. 6-AL with rev control now features two rotary dials to set the RPM limit with a soft touch rev control, no more RPM "pills". For most 4/6/8-Cylinder Engines with 12-18V Electrical System & a Distributor.

Boost Timing Master

Allows you to adjust the amount of ignition retard from 1-degree per pound of boost to 3-degrees per pound with a maximum of 15-degrees retard. This is adjustable with a dash-mounted control knob. It has a boost pressure port to connect to your manifold and easy wiring to connect to the MSD ignition control. Must be used with MSD 6, 7, 8, or 10.

..... **8762** ..... **$274.95 ea**

Digital-6 Plus CD Ignition

Built-in features include two rotary switch adjustable rev limiters, a single-stage timing retard, a start-up timing retard, an LED fault display, EMI protection, and much more! The 15 MHz micro-controller can analyze up to 15,000,000 critical instructions per second! Every spark is packed with 135 millijoules of spark energy and 535v of power.

..... **6520** ..... **324.95 ea**

Three Stage Retard Controller

Allows you to retard your ignition timing in three different stages. An optional starting function retards the timing 20° while cranking the engine. It can also be used as a single or dual retard to increase mph at the end of the drag strip. Works with points, crank triggers or magnetic pickup distributors and must be used with an MSD 6, 7, or 8 Series Ignition.

Street Fire Plug Wire Sets

These plug wires are made of a heat and abrasion resistant 8mm silicone jacket around a spiral wound conductor and durable Kevlar core. The spiral wind on the conductor suppresses electromagnetic interference (EMI) for clear radio signal. Black silicone boots and sheath, secure heavy-duty terminals and a low, 500 ohms per foot resistance for an exceptional spark path make this the wire set to have!

LED Shelby Taillight Conversions

Convert your Mustang to Shelby-style tailights without having to cut up the stock tailight panel! Includes LED bulb panels, lenses & bezels. 1965-1966 kits include a custom fiberglass light panel. 1967-1970 cars need a stock Shelby-style panel, #X1026. Turn signals light up inside to outside, brake lights operate conventionally for safety, unlike the Shelby lights that sequenced.

Shelby Stripe Kits

Original Shelbys have painted Le Mans stripes.

Distance between stripes is 2"

Le Mans Stripe Stencil Kits

To add Le Mans stripes to an early GT350, they should be painted on as they were for the originals. This self adhesive stencil applies to the body to properly mask off the area to be painted. Licensed by the Ford Motor Company. Complete instructions included.

Returns & Exchanges

At Mustangs Unlimited, we try to make returns and exchanges as easy as possible. All returns must be made within 90 days of receipt, in "new" condition and in its original packaging. Sorry, there are no returns on special orders, electrical items, literature or video tapes. For more information, see "Ordering Information and Policies" on the back of your order form.

Core Deposit & Refund Policy

All re-manufactured parts, unless noted, require a core deposit. Core deposit must be the same year and type of the one you are purchasing, (e.g. - purchase of a 1966 power steering pump must be exchanged with a 1966 power steering pump). The core deposit will be charged on all appropriate orders and the refund will be issued after the core has been inspected and approved by the manufacturer.

A qualified core deposit must be: In its original box! • Rebuildable • Complete • Assembled
Any cores not meeting the refund specifications will be returned to the customer upon request at the customers expense.
Note: C.O.D. returns will not be accepted. Prepaid freight only.

Ordering Information & Policies

At Mustangs Unlimited we want to make everything as easy as possible for our customers. Please read the ordering information carefully & thoroughly. If you have any questions, call our Connecticut @ 860-647-1965 or Georgia @ 770-446-1965 locations.

Our Promise

Mustangs Unlimited wants you to be completely satisfied with everything you purchase from us. If, within 90 days of purchase, you are not completely satisfied with a part, simply call us. We will take all possible steps to correct the problem. See our return policy for complete instructions.

Ordering

Ordering is easy! You may place your order by:

- Phone our helpful and friendly sales representatives.
- FAX 24/7 to **Connecticut (860) 649-1260 or Georgia (770) 446-3055.**
- Mail by using forms located in the back of the book (additional forms can be downloaded from our website).
- Online at www.mustangsunlimited.com.

If mailing or faxing your orders, fill out the order form completely to allow your order to be processed more efficiently. If ordering by phone, please have your part numbers & payment method ready when you call.

- **SPECIAL ORDERS:** Thousands of parts not listed in our catalogs are available. Allow 2-4 weeks delivery on these items.
- Color samples - On items like headliners or carpet, to ensure the correct style and/or color, please send a small sample so we can match the item as closely as possible.

Backorders

Backorders automatically ship as inventory is received unless otherwise specified at time of order. Any mailed-in prepaid orders stating "No Backorders" will be promptly credited. **Credit card orders are not charged until shipment is made.** Backorders may be cancelled after 60 days, depending on availability, & a refund will be issued if due.

Payment

Orders may be paid with Discover, Mastercard, Visa, American Express, Money Order, or Bank Draft.

Shipping & Handling (Summary)

- All packages shipped within Connecticut or Georgia are subject to state/local sales tax.
- Most orders can be shipped via UPS, USPS or FedEx. Shipping charges for most orders $.01-$79.95 are $7.95. Orders of $79.96-$299.99 are 10%. Orders of $300.00 or more qualify for **FREE** ground shipping in the lower 48 U.S. states. Oversize & truck freight charges still apply (see below).
- To ship some larger or heavier items we are charged an additional fee from UPS, USPS & FedEx. Each Oversize 1 (OS1) item is subject to an additional $9.95 charge, each Oversize 2 (OS2) item $14.95 & each Oversize 3 item (OS3) $50.00.
- A small number of other hard to handle items like tires, batteries, disc brake kits, glass, etc. may also have Special Shipping Charges and are generally noted.
- Items too large for USPS, UPS or FedEx will be shipped by truck freight. NOTE: A symbol of a truck is used to denote freight shipments.
- International orders should contact us to confirm shipping charges before ordering.

Rush Service

Most orders are shipped Ground Service. In stock parts normally ship the day order is placed, Monday through Friday, if the order is received by 12:00 noon EST. We also offer "Next Business Day", "2nd Business Day", & "3 Day Select". "3 Day Select" is a service which will guarantee delivery within three business days, (ideal for west coast deliveries). Charges are calculated by weight & size at time of shipment. Saturday delivery is available for most locations (additional $15.00).

Truck Shipments

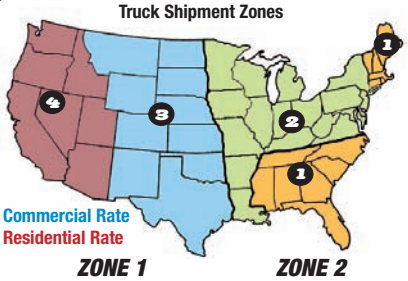

The truck freight symbol tells you that an item is too large for UPS, USPS or FedEx to handle and must be shipped by a truck line. All truck freight orders must be prepaid. We've negotiated very competitive shipping rates based on the large volume of packages we ship. To determine the amount of freight you will be charged on a truck freight item, locate the zone you're in on the chart below and compare the shipping charges listed. **Residential delivery will add $20.00 to your shipping charge.** To be considered a commercial address there must be a shipping dock able to receive truck deliveries. Delivery signature required.

All rates are subject to change at any time, so please confirm the shipping charges with your sales representative when you place your order. ***Mustangs Unlimited will not be responsible for freight charges on any refused truck shipments. Important, please see damages.***

Inspect Your Orders

Please inspect all your merchandise immediately upon delivery. Notify us of any discrepancies within 3 days of receipt. We do not allow claims after 3 days. ***Important, please see DAMAGES.***
