Navigating with bookmarks

This manual is primarily organized using “bookmarks”. Bookmarks are found on the left side of the screen and allow the user to navigate directly to a specific location within the document.

To browse using a bookmark:

1. Click the Bookmarks tab on the left side of the window, or choose view>Navigation Tabs>Bookmarks to display bookmarks.
2. To jump to a topic using its bookmark, click the bookmark. Click the plus sign (+) next to a parent bookmark to expand it. Click the minus sign (-) next to a bookmark to hide its children.

Note: Clicking a bookmark might perform an action instead of taking you to another location. It depends on how the bookmark was defined. For example, a hyperlinked bookmark could take you to a website.

If the list of bookmarks disappears when you click a bookmark, click the Bookmarks tab to display the list again. If you want the Bookmarks tab to always remain open after you click a bookmark, click the Options menu at the top of the Bookmarks panel, and make sure Hide After Use is not selected.

Basic Manual Organization

This manual is organized in three ways: **Illustration Number**, **Groupings by Sections** and **Alphabetical**.

Illustration Number:

Each illustration has its own illustration number. For example, the illustration for Brake & Clutch Pedals is illustration number “P-4472” and the illustration for the Brake Cylinder Details is “P-2990”. The pages of this book are arranged in illustration number order. Therefore, illustration 4473 would follow 2990.

Note: Illustrations are in numerical, not alphabetical order.

Groupings by Sections:

The grouping of diagrams by “section” is similar to how the Ford Motor Company originally organized its Master Parts and Accessories Catalog which contained both illustrations and part numbers to identify parts. For example, **Section 20 – Brakes** groups most brake related parts for this vehicle.

This manual uses bookmarks to follow that same organization and uses the same terms Ford used to identify the diagrams. In addition, the diagram number has been added to the end of the description. For example, **“Disc Brake System 4470”** is the basic name of the diagram and the diagram number is 4470. For the bookmarks and index’s in this manual, the “P-“ has been omitted.

Sec 20 - Brakes

- Brake & Clutch Pedals 4472
- Disc Brake System 4470
 - Brake booster installation (Bendix) 4533
 - Booster Details (Bendix) 4590
- Brake Cylinder Details - rear 2990
- Brake details -disc front 4604
- Brake details - drum rear 3703
- Brake master cylinder details 3098
- Drum Brake System 4470
 - Brake booster installation (Bendix) 4533
 - Booster details (Bendix) 4590
 - Brake cylinder details - front & rear 2990
 - Brake details - front & rear 2990
 - Brake master cylinder details 3098
- Parking Brake System 4470

The grouping of diagrams by number is useful in finding most diagrams related to a major group.

Alphabetical:

The alphabetical listing is a simple alphabetized listing of all diagrams. In some cases, if the diagram contained more than one major component, the diagram may be identified more than once. Expand the “Index, Alphabetical” bookmark to view details. The associated page contains the description, diagram number and page number for easy reference.

The screenshot shows a software window titled "1965 Exploded Parts Diagrams Manual". On the left, a "Bookmarks" pane lists several items, with "Index, Alphabetical" highlighted and circled in red. The main area displays a table titled "Index, Alphabetical" with three columns: "Description", "Diagram", and "Page". The table lists various engine components and their corresponding diagram numbers and page numbers.
