Now you don't have to replace the entire door hinge assembly on GM & Ford trucks when only the spring is broken. You eliminate removing, replacing and realigning the door.

These OEM equivalent springs have been redesigned to make installation easier. The job goes much faster too, when you use Auveco installation tool 14556. The whole procedure is now this easy:

1. Remove the original spring using the 14556 tool and a ratchet wrench With a 1/2" square drive.
2. Place the new spring into the upper slots of the hinge.
3. Use the wrench and the 14556 tool to twist and drive the spring into place. You may need a light hammer to tap the spring into the lower slots.
