

- Check that the brake fluid in the reservoir is at the maximum level; if this is not the case, top up using the recommended fluid.
- When topping up the brake fluid, remove the reservoir cap and top up using the recommended fluid until the maximum level is reached.

Component	Type	Description	Classification	Qty.	Validity
BRAKE-CLUTCH HYDRAULIC SYSTEM	Fluid [kg]	TUTELA TOP 4 Contractual Technical Reference N. F001.A93	FMVSS n. 116 DOT 4, ISO 4925, SAE J1704 - FIAT 9.55597	0.78	1750 Turbo Petrol

-  The fluid in the reservoir should not exceed the MAX notch.
-  The symbol on the tank identifies synthetic brake fluids, distinguishing them from mineral fluids. Using mineral fluids irreparably damages the special braking system rubber seals.
-  Take great care to prevent the brake fluid, which is extremely corrosive, from coming into contact with the paintwork. If this does happen, wash immediately with hot water.
-  Brake fluid is poisonous and highly corrosive. In the event of accidental contact, immediately wash the affected parts with water and neutral soap, then rinse thoroughly. Call a doctor immediately if swallowed.
